SUMMARY

Second-year AI student with hands-on experience building end-to-end NLP systems and deployable software tools. Focused on practical machine learning, systems engineering, and writing clean, maintainable code beyond the notebook.

EDUCATION

University of Engineering and Technology <i>BS Artificial Intelligence GPA: 3.25/4.0</i>	Lahore, Pakistan 2025 – Present
Forman Christian College <i>Intermediate Computer Science</i>	Lahore, Pakistan 2022 – 2024

PROJECTS

News NLP Pipeline <i>Python, BERTopic, scikit-learn, spaCy, Transformers, Streamlit</i>	2026 – Present
- Processed 350k+ news articles and headlines from Dawn (2010–2025) through an end-to-end NLP pipeline - Built downstream tasks including sentiment analysis, named entity recognition, and news category classification - Applied BERTopic with UMAP and KMeans for unsupervised topic discovery across 15 years of coverage - Deployed interactive Streamlit dashboard for exploring results, topic distributions, and visualizations	
WMUS <i>Python, curses</i>	2026 – Present
- Built a terminal music player for Windows with fuzzy search, vim-style navigation, and configurable keybindings - Designed modular architecture separating audio playback, UI rendering, and state management - Packaged with a versioned installer and fast metadata caching for large music libraries	
Waddle Away <i>Godot, GDScript</i>	2026
Built and published a 2D endless runner with procedural obstacles, progressive difficulty, and polished controls	

TECHNICAL SKILLS

Languages: Python, C++, HTML, CSS
Tools & Platforms: Git, Linux, Streamlit, SQLite
Machine Learning & NLP: NumPy, Pandas, Matplotlib, scikit-learn, PyTorch, Transformers, Hugging Face, BERTopic
